ОПИСАНИЕ:

In Incipit, a single manufacturing deed results into a well-calibrated combination of optical, mechanical, and thermal principles - the mainstays of the broad literature on light. Its design is minimal and no-frills. The vertical spokes have a mechanical function and also play a crucial role in conduction of the heat generated by the lighting source. The aluminium-finished version, in both sizes, ensures compliance with the UGR factor (<19) and a luminance of <3000cd/m² between 65° and 85°, with medium-aperture beams and high yields, by which the appliance is suited for work environments.
