**ОПИСАНИЕ:**

In a m<sup>2</sup> of surface where the light flows in a fluid way on transparent wires and, through a mirrored reflector, materializes a lighting and volumetric effect which is controlled. It is a cubic metre of light where everything is endlessly reflected, freely modulating more than a million of chromatic effects. The space is no more just one, but several, or simply "else", illusory perception of reality, which drives to a new place, elsewhere. Three versions are available, with three kind of light. Opening light: perimeter structure made of steel, top side mirror reflector, side diffusers made of opaline methacrylate, front diffuser in transparent engraved methacrylate. Volumetric light: perimeter structure made of steel, top side segment reflector, side diffusers made of opaline methacrylate, front diffuser in transparent engraved methacrylate. Fluid light: perimeter structure made of steel, side diffusers made of opaline methacrylate, front diffuser in transparent engraved methacrylate.
